RE: Upper Cervical recommendation

Dear Pastor:

IUCPAA is an international association of Upper Cervical Advocates. We represent advocates in four countries and over 1600 Upper Cervical doctors world-wide. Our mission is to reach people in painful, hopeless situations who have failed to find adequate help through regular medical, therapeutic or chiropractic means. We believe Upper Cervical may be the answer they've prayed for. It was for us, and thousands others.

Although Upper Cervical focuses on science, we are also aware of the spiritual side of healing. We've personally experienced both the miraculous and a combination of science and prayer. We've heard stories from hurting Christians who failed to find an answer for their ailments from traditional medical sources or through faith at the local church level. We discount neither, but offer this alternative that has produced health and wellness for thousands.

The founders of IUCPAA discovered Upper Cervical Care in the late 1990's after searching for answers for over a decade. One of us suffered with severe facial pain, another Meinere's Disease and the other severe female problems, arthritis and a chronic cough. These experiences produced a passion in each of us to "go into all the world and share the good news" of healing and health. This letter is a part of that mission.

We pray that you consider inviting an Upper Cervical doctor or a patient advocate into your church to share Upper Cervical Care and its benefits. Health is achieved when the "mouth of God" (the axis/atlas) is properly positioned, thus allowing the innate life signals to travel from the brain stem to the brain and back to vital organs, muscles and the entire body. Jessica Jones shares the spiritual significance of Upper Cervical healing in her book *Wondrously Made*. James Tomasi shares his story of a 12 year battle with debilitating pain in his book *what Time, Tuesday?* Other testimonies are in the back of each book.

A talk might include testimonies, DVD's, books, education, a professional movie *The Power of Upper Cervical* or educational syllabus materials. A class can be scheduled as a one-time education night, a Pain management course or a series of health education classes.

We encourage you to share this message of hope to your congregation. We are here to serve with general health education in any avenue you deem acceptable. Please review our websites for additional details.

Please feel free to contact Upper Cervical Advocates, or a local UC DC office. God bless you.

In His service,
Rhonda Tomasi, President
International Upper Cervical Patient Advocates Association
